

Jigsaw Business provides bespoke CAD system with built-in design rule checking for leading bathroom retailer

When Dolphin Bathrooms required a fully integrated business system with the flexibility to manage their specific operational requirements and integrate with their existing systems, they selected Jigsaw Business from Profactum Ltd.

Dolphin Bathrooms is the UK's leading supplier of bathrooms to the domestic market. Dolphin design and fully install complete bathrooms throughout the UK, offering a wide range of suites, taps, furniture, tiles and accessories.

A bespoke bathroom CAD system was developed for Dolphin including:

- CAD bathroom design system including materials extraction to integrate with Dolphin's existing client order processing and stock systems.
- Product Catalogue incorporating sales, technical and supplier data as well as 3D CAD designs in one central location accessible throughout the company. The flexibility of the Jigsaw Business product book allows Dolphin to maintain their own catalogues, including tools to build new 3D CAD models.
- CAD design rule verification to check each design and ensure that regulations are adhered to and no corners are cut in the design process. Jigsaw Business provides Dolphin with the facility to develop and maintain their own rules accordingly.
